

САЩ продължават да губят позиции

Германия е изместила САЩ по частни инвестиции в сектора на зелената енергия и вече заема второ място след Китай. Това става ясно от нов доклад от The Pew Charitable Trusts, [Who's Winning the Clean Energy Race? 2010 Edition \(PDF\)](#) .

Според Филип Кутиньо, директор на Pew's Clean Energy Program, "позицията на САЩ като водеща страна инвеститор в чиста енергия намалява, защото политическата рамка е слаба и несигурна".

Ето как изглежда разпределението по държави и сектори:

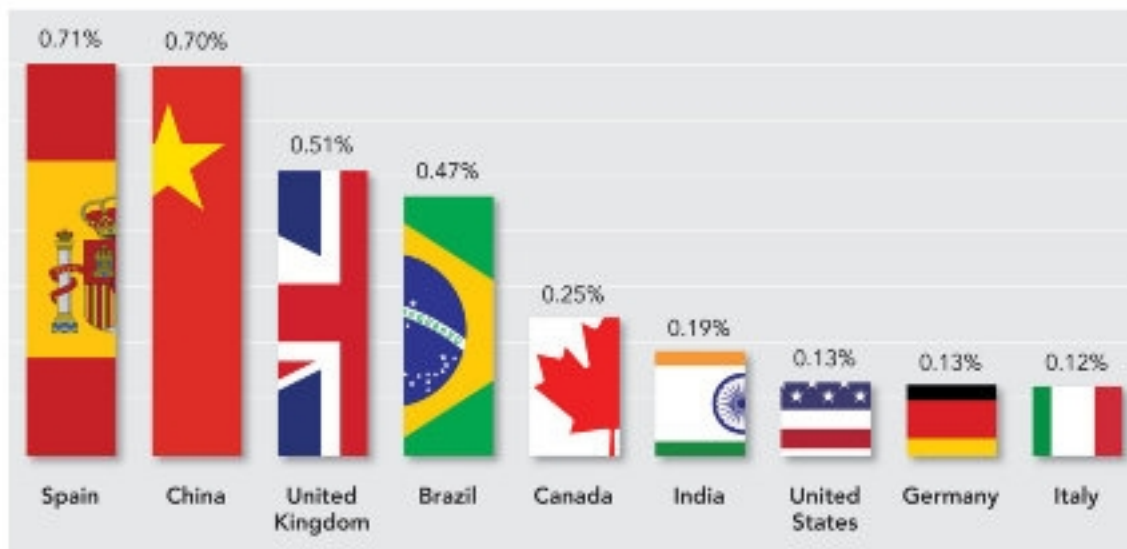

FIGURE 7: INVESTMENT BY COUNTRY AND SECTOR, 2010 (BILLIONS OF \$)

Germany invests 5.1% of GDP in clean energy, 0.1% of GDP in wind, 0.1% of GDP in solar, 0.1% of GDP in other renewables, 0.1% of GDP in biofuels, 0.1% of GDP in efficiency

Top Countries in Clean Energy Investment
